Summary

I am a motivated Full Stack Developer with strong skills in **HTML, CSS, JavaScript, React, and Node.js**.
 I began my coding journey in 2024 by completing a comprehensive Full Stack Development course and I am currently expanding my knowledge with **TypeScript** and **SQL**.

I am eager to apply my skills to build efficient and user-friendly web applications.
 My background as a personal trainer has strengthened my **communication, teamwork, and problem-solving skills**, helping me to collaborate effectively within development teams.

Technical Skills

HTML5, CSS3, JavaScript (ES6+), React, Redux
 REST API, Handlebars, Webpack, Parcel
 Node.js, MongoDB, TypeScript, SQL

Project Experience (GoIT)

ICE CREAM PROJECT — *Developer*
 (HTML, SASS, Parcel)
 Built a responsive and animated group website for ordering natural ice cream. Ensured smooth user experience and optimized for performance.

BOOKSHELF — *Developer*
 (HTML, SASS, JavaScript, Handlebars, REST API, Parcel)
 Developed a dynamic web application that allows users to browse and manage a personal book list. Implemented responsive design and API data handling.

Individual project — *Developer*
 (HTML, SASS)
 Created a responsive personal website using HTML and SASS. Focused on clean layout, accessibility, and consistent Git version control.
